

Aditya Varshney

React • TypeScript • Node JS

EXPERIENCE

Decharge • Remote • India

Internship • Web 3 Product Engineer

Sep' 24 – Present

- Built and deployed Decharge's official [website](#) and platform on AWS, implementing responsive design and optimized performance.
- Launched the **first** live [sale](#) enabling users to buy products with **SpherePay** and **HelioPay** along with a user dashboard and interactive map.
- Built and published **dApps** on the **Solana dApp Store** with wallet connectivity, token swapping, and payment solutions, documenting workflows on **Gitbook**.

Infinisync • Remote • India

Internship • Frontend Developer

July' 24 – Sep'24

- Contributed to core projects at **Infinisync** as a React developer, delivering scalable and user-focused solutions that enhanced client satisfaction and streamlined business operations.
- Optimized API with **RTK Query**, improving data fetching by **30%** and enabling real-time interactions for **1,000+ users** via **WebSockets** and **LLMs**.

Sol-Speed • Remote • India

Contract • Backend Developer

April' 24 – May' 24

- Developed a **scalable backend** for a Solana-based project using **Next.js**, **TypeScript**, and **Supabase**, integrating **RESTful APIs** and **Solana blockchain** for seamless frontend-backend communication and secure transactions.

PROJECTS AND OTHER WORKS

Solcanvas • [Repository](#) • Solana-based Web3 platform

- Solana-based **dApp** for project discovery and management, allowing users to **add**, **edit**, and **commit** projects, with admin control for approvals and user management.
- **Multi-wallet** login, Solana **blockchain** integration, **NFT** minting, and a **reward** system for decentralized operations.
- **Tech Stack**: Next.js, TypeScript, Supabase, Tailwind CSS, Context API, Solana

Huntshot • [Repository](#) • AI platform simplifying hiring on Solana

- Built **AI**-based resume **parsing** and profile creation.
- Integrated **Solana** blockchain for payments and **NFT** subscriptions.
- Automated personalized email outreach for improved engagement.
- Enabled secure onboarding via **Okto** wallet authentication.

– **Tech Stack**: ReactJS, Supabase, Mistral Llm Api, Okto auth, NFT, Solana

eShopX • [Repository](#) • A Full-Stack ecommerce platform

- Cart management, checkout, **CRUD** operations, product search, and **Stripe** payment integration.
- **Admin**: Manage products, discounts, analytics, orders, stock, and users.
- **User**: Handle payments, manage baskets, and sort products.

– **Tech Stack**: ReactJS, TailwindCSS, NodeJS, ExpressJS, MongoDB, Multer, Firebase, TypeScript, Stripe.

Personal Portfolio • [Repository](#)

- Developed a personal portfolio using React, TypeScript, Tailwind CSS, and Framer for showcasing projects and skills.

SKILLS

Languages

Javascript, Typescript, Java

Frameworks / Libraries

Nextjs, React, React Native, Tailwind CSS, Gsap, Three.js, Framer, Shadcn, Node Js, Express Js, Redux, Supabase, Solana/Web3.js, Expo

Tools

Postman, Git, Github, Gitlab, Figma, Github Action, Bitbucket

Databases

PSQL, MongoDB, Supabase, Firebase

VOLUNTEER EXPERIENCE

Contributor

Superteam • India

- Volunteering in the events conducted by the community.

Core

FOSSCU • New Delhi

- Conducted tech events and talks for the student tech community.
- Manage the weekly meetups and help in conducting them.
- Mentor Students to get started contributing to open source.

ACHIEVEMENTS

Grant Recipient

- Successfully Built a Grant recipient **Superteam** Instagrants for developing **Solcanvas**.
- Shortlisted in Internal Hackathon for **SIH'23**

EDUCATION

B.Tech • Information & Technology

KIET Group of Institutions – AKTU • Delhi NCR
2022 – 2026
